## (54) INQUIRY ITEM GENERATOR

## (57)Abstract

**PURPOSE:** To provide an inquiry item generator which can generate an optimum inquiry item corresponding to a user.

**CONSTITUTION:** This device is provided with a characteristic selecting means 200 to generate the inquiry item for deciding a user model based on a selection reference 7 describing the important degree of a characteristic item from a user model library 5, pattern collating means 300 for collating each user model pattern inside the user model library with an answer from the user with respect to the inquiry item while using a collation reference 8 so as to generate the user model, and correspondence knowledge adapting means 400 for deciding the value of a required item for a problem solver based on information provided from information acquired from the user, a user model and correspondence knowledge with respect to the inquiry item for deciding the value of the non-decided required item.

## LEGAL STATUS

- [Date of request for examination]
- [Date of sending the examiner's decision of rejection]
- [Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
- [Date of final disposal for application]
- [Patent number]
- [Date of registration]
- [Number of appeal against examiner's decision of rejection]
- [Date of requesting appeal against examiner's decision of rejection]
- [Date of extinction of right]
